## CONTENTS

*Research Papers*

Studies of a subarctic coastal marsh. III. Modelling the subsurface water fluxes and chloride distribution
J.S. Price (St. John's, Nfld., Canada) and M.-K. Woo (Hamilton, Ont., Canada) . . . . 1
Evapotranspiration from the margin and moist playa of a closed desert valley
E. Malek, G.E. Bingham and G.D. McCurdy (Logan, UT, U.S.A.). . . . . 15
Bias and variance of quantile estimates from a partial duration series
T.A. Buishand (AE de Bilt, The Netherlands) . . . . . 35
Checks on the measurement of potential evapotranspiration using water balance data and independent measures of groundwater recharge
C.I. Essery (Liverpool, U.K.) and D.N. Wilcock (Coleraine, Northern Ireland, U.K.). . 51
Parameter estimation for seasonal to subseasonal disaggregation
G.-F. Lin (Taiwan, Republic of China) . . . . . 65
Annual and seasonal fluctuations of precipitation and streamflow in the Aconcagua River basin, Chile
P.R. Waylen and C.N. Caviedes (Gainesville, FL, U.S.A.) . . . . . 79
Estimation of the GEV distribution from censored samples by method of partial probability weighted moments
Q.J. Wang (Galway, Ireland). . . . . 103
Unbiased estimation of probability weighted moments and partial probability weighted moments from systematic and historical flood information and their application to estimating the GEV distribution
Q.J. Wang (Galway, Ireland). . . . . 115
Déplacement miscible avec contrastes de densité et de viscosité en milieu poreux. Identification des paramètres de déplacement et stabilité en régime de dispersion mécanique
M.A. Buès (Schiltigheim, France) and L. Zilliox (Strasbourg, France) . . . . . 125
Modelling stream acidification in afforested catchments: long-term reconstructions at two sites in central Scotland
B.J. Cosby (Durham, NC, U.S.A.), A. Jenkins (Wallingford, U.K.), R.C. Ferrier, J.D. Miller and T.A.B. Walker (Aberdeen, U.K.) . . . . . 143
Modelling stream acidification in afforested catchments: an assessment of the relative effects of acid deposition and afforestation
A. Jenkins (Wallingford, U.K.), B.J. Cosby (Durham, NC, U.S.A.), R.C. Ferrier, T.A.B. Walker and J.D. Miller (Aberdeen, U.K.) . . . . . 163
Critical drought analysis by second-order Markov chain
Z. Şen (Istanbul, Turkey) . . . . . 183
Huanghe (Yellow River) and its estuary: sediment origin, transport and deposition
J. Zhang, W.W. Huang and M.C. Shi (Qingdao, P.R. China) . . . . . 203
Geochemical calculations and observations on salt water intrusions. II. Validation of a geochemical model with laboratory experiments
C.A.J. Appelo, H.E. Beekman, J. Griffioen (Amsterdam, The Netherlands) and A. Willemsen (Arnhem, The Netherlands) . . . . . 225
Organic carbon isotope geochemistry of clayey deposits and their associated porewaters, southern Alberta
L.I. Wassenaar, R. Aravena (Waterloo, Ont., Canada), M.J. Hendry (Saskatóon, Sask., Canada) and P. Fritz (Neuherberg, West Germany) . . . . . 251
Comportement piézométrique des nappes d'altérites en zone intertropicale humide d'altitude

(hauts plateaux de Madagascar)
J.C. Grillot, M. Raunet (Montpellier, France) et L. Ferry (Antananarivo, Madagascar) 271
Les courbes flux chimique – débit et le fonctionnement des aquiferes karstiques
J. Mudry (Dakar-Fann, Senegal) . . . . . 283
Comparison of estimates of snow input with a small alpine catchment
R.A. Sommerfeld, R.C. Musselman and G.L. Wooldridge (Fort Collins, CO, U.S.A.) . . 295
Examination of Morton's CRAE model for estimating daily evaporation from field-sized areas
R.J. Granger and D.M. Gray (Saskatoon, Sask., Canada) . . . . . 309
Atoll island hydrogeology: flow and freshwater occurrence in a tidally dominated system
J.A. Oberdorfer, P.J. Hogan (San Jose, CA, U.S.) and R.W. Buddemeier (Livermore, CA, U.S.A.) . . . . . 327
Regional modelling of groundwater flow and salt and environmental tracer transport in deep aquifers in the Paris Basin
H.F. Wei, E. Ledoux and G. de Marsily (Fontainebleau, France) . . . . . 341
Water and solute movement in a coarse-textured water-repellent field soil
J.C. van Dam, J.M.H. Hendrickx, L.W. Dekker (Wageningen, The Netherlands), H.C. van Ommen, M.H. Bannink (De Bilt, The Netherlands) and M. Th. van Genuchten (Riverside, CA, U.S.A) . . . . . 359
Ecohydrological parameters indicating different types of shallow groundwater
B. Pedroli (Amsterdam, The Netherlands) . . . . . 381

*Discussion*

Changing ideas in hydrology – the case of physically based models – Comment
K. Loague (Berkeley, CA, U.S.A.) . . . . . 405

*Announcement* . . . . . 409
